To,

Hiring Manager,

Dear Hiring Manager,

Thank you for the opportunity to apply for Software Developer role in your company. I am a master student at University of Central Florida majoring in Computer Science. Prior to this, I worked at Cognizant Technology Solutions (India) as Programmer Analyst. My responsibilities include problem management and change management to improve the application functionality. I worked with Business Analysts, Software Architects on client requirements and convert the requirements into technical design.

Before working with Cognizant, I worked as a Graduate Intern in BMC Software (India). My work in BMC was on Distributed Version Control System. I was responsible to implement Git features to support BMC proprietary network shell protocol (NSH). I worked on libgit2 library to implement Git functionality.

I was engaged in Agile (Scrum) Software Development process, Design and Analysis of Web Application Development and Support. I have strong background in Data Structures, Algorithm Paradigms, Object Oriented Programming, Database management, Web-development Frameworks and can apply them on solve realistic problems.

I believe that I have the necessary skills to qualify for this position and meet the expectations. I anticipate to take this opportunity to learn and improve my skills that will be beneficial to the company.

Thank you for your time and consideration.

Sincerely,
Apurv Parekh
